High Definition Multimedia Interface (HDMI) is the future for HDTV, as it enables only one cable to deliver both high-definition video and multi-channel, digital audio to digital display devices such as LCD TVs, plasma displays and projectors. HDMI also enables an all-digital connection between digital source devices, such as DVD players, DVD recorders, digital set-top boxes, D-VHS players and A/V receivers.

V7 DVI DUAL LINK CABLE 24+1

3 m	V7E-DV4141-03M J150699

The DVI Cable provides a high-bandwidth video interface suitable for today's host and display devices, and addresses potential future bandwidth requirements.
